INDEX OF AUTHORS

Volume V

Transactions of American Society for Steel Treating

January, 1924—June, 1924

A

Aitchison, Leslie ---------- 491

B

Bain, E. C. ---------- 89
Barton, L. J. ---------- 369
Belaiew, N. T. ----------219, 549

C

Collins, E. F. ---------- 67

D

Dowdell, R. L. ---------- 27
Downes, Frederick ---------- 285

E

Ellis, O. W. ---------- 209

F

Farmer, Malcolm ---------- 590
Flanders, H. E. ---------- 183
Foster, L. V. ---------- 413

G

Gathmann, Emil ---------- 158

H

Hayes, Anson ---------- 183
Homerberg, V. O. ---------- 399
Hudson, R. M. ---------- 276

J

Janitzky, E. J. ---------- 201

L

LeChatelier, F. ---------- 457
Lessells, J. M. ---------- 144
Little, A. D. ---------- 195

M

MacNutt, E. K. ---------- 348
Malcolm, V. T. ---------- 256
Moore, E. E. ---------- 183

P

Pierce, E. W. ---------- 571
Portevin, A. ---------- 457

R

Richardson, Nicholas ---------- 348
Rockwell, S. P. ---------- 285

S

Sanford, R. L. ---------- 577
Shepherd, B. F. ---------- 485

T

Thum, E. E. ---------- 214
Tour, Sam ---------- 7

W

Williams, H. M. ---------- 82
Williams, R. S. ---------- 399
Williams, S. R. ----------362, 479

INDEX OF SUBJECTS AND AUTHORS OF PAPERS

Volume V

TRANSACTIONS of American Society for Steel Treating

January, 1924—June, 1924

A

Abstracts of Technical Articles ---------- 119
233
338
435
527
623

Acid Electric Steel for Commercial Castings; Manufacture of—*L. J. Barton* ---------- 369

A Few Notes on the Shimer Case Hardening Process—*B. F. Shepherd*__ 485

Alloys; Granulation Hypothesis and the Delta-Gamma Change in Iron-Carbon and Iron-Nickel Alloys—*Col. N. T. Belaiew* ---------- 549

Alloys; Heat Treatment of Aluminum-Copper Alloys—*A. Portevin and F. LeChatelier* ---------- 457

Aluminum-Copper Alloys; Heat Treatment of—*A. Portevin and F. LeChatelier* ---------- 457

Analysis; Present Status of Magnetic Analysis—*R. L. Sanford*---------- 577

Applicability of Heating Curves to Calculate Time Required to Reach Constant Head Temperatures; and Characteristics—*E. J. Janitzky*__ 201

Austenitized High Chromium Steels; Secondary Hardness in—*E. C. Bain* 89

Automobile Sheet Steel Specifications—*H. M. Williams*---------- 82

B

Bureau of Mines; Notes from the U. S. ---------- 114
230
424
513
606

Bureau of Standards; Notes from the U. S. ---------- 111
228
329
427
511
605

C

Calculating Time Required to Reach Constant Head Temperatures; Characteristics of Heating Curves and Their Applicability for—*E. J. Janitzky* ---------- 201

Carbon and Carbon-Vanadium Steel Castings—A Comparison—*J. M. Lessells* ---- 144
Carbon-Vanadium and Carbon Steel Castings—A Comparison—*J. M. Lessells* ---- 144
Case Depth; What is it?—*S. P. Rockwell and Frederick Downes*---- 285
Case Hardening Process; A Few Notes on the Shimer Process.—*B. F. Shepherd* ---- 485
Castings—A Comparison of Carbon and Carbon-Vanadium Steel Castings—*J. M. Lessells* ---- 144
Castings; Manufacture of Acid Electric Steel for Commercial Castings—*L. J. Barton* ---- 369
Characteristics of Heating Curves—Their Applicability for Calculating the Time Required to Reach Constant Head Temperatures—*E. J. Janitzky* ---- 201
Chromium Steels; Secondary Hardness in Austenitized High Chromium Steels—*E. C. Bain* ---- 89
Cold Rolled Strip Steel—*Malcolm Farmer* ---- 590
Comment and Discussion ---- 232
Comparison of Carbon and Carbon-Vanadium Steel Castings—*J. M. Lessells* ---- 144
Constant Head Temperatures; Characteristics of Heating Curves and Their Applicability for Calculating the Time Required to Reach—*E. J. Janitzky* ---- 201
Containers for Hardening; Salt Baths and—*Sam Tour* ---- 7
Cooling and Heating Curve Values to Zero Rates; Identification of the Thermal Effect of Iron-Carbon Eutectoid and Extrapolation of the—*Dr. Anson Hayes, H. E. Flanders and E. E. Moore*---- 183
Correlation between the Mechanical Hardness and the Magnetostrictive Effects of the Ferromagnetic Substances—*S. R. Williams*---- 362
Curve Values to Zero Rates; Identification of the Thermal Effect of Iron-Carbon Eutectoid and Extrapolation of the Heating and Cooling—*Dr. Anson Hayes, H. E. Flanders and E. E. Moore*---- 183
Curves; Characteristics of Heating Curves and Their Applicability for Calculating the Time Required to Reach Constant Head Temperatures—*E. J. Janitzky* ---- 201

D

Data on Molybdenum Steel; Production Data—*E. W. Pierce*---- 571
Defects of Hardened Steels; Fundamental Defects—*Dr. Leslie Aitchison* 491
Delta-Gamma Change in Iron-Carbon and Iron-Nickel Alloys and Granulation Hypothesis—*Col. N. T. Belaiew* ---- 549
Depth; What is Case Depth?—*S. P. Rockwell and Frederick Downes*---- 285
Discussion and Comment ---- 232
Discussion of H. J. French and Jerome Strauss' Paper Entitled "Effect of Heat Treatment on Lathe Performance and Some other Properties of High Speed Steel," Presented before the Pittsburgh Con-

vention of the Society, 1923. Paper Published in September, 1923, TRANSACTIONS ---------- 317
Discussion of H. S. George's Paper Entitled "Conical Illumination," Presented before the Pittsburgh Convention of the Society, 1923. Paper Published in August, 1923, TRANSACTIONS ---------- 325
Discussion of Zay Jeffries and R. S. Archer's Paper Entitled, "The Hardening of Steel," Presented before the Pittsburgh Convention of the Society, 1923. Paper Published in September, 1923, TRANSACTIONS ---------- 504
Discussion of H. B. Knowlton's Paper Entitled, "Case Hardening and Other Heat Treatments as Applied to Gray Cast Iron," Presented before the Pittsburgh Convention of the Society, 1923. Paper Published in October, 1923, TRANSACTIONS ---------- 599
Discussion of Professor Albert Sauveur's Paper Entitled, "Crystallization of Iron and Its Alloys"—*O. W. Ellis* ---------- 209
—*Col. N. T. Belaiew* ---------- 219
—*E. E. Thum* ---------- 214
Discussion of J. S. Vanick and H. K. Herschman's Paper Entitled, "Protective Coatings for Selective Carburization," Presented before the Pittsburgh Convention of the Society, 1923. Paper Published in September, 1923, TRANSACTIONS ---------- 420
Discussion of W. P. Wood's Paper Entitled, "Seasoning of Steel," Presented before the Pittsburgh Convention of the Society, 1923. Paper Published in October, 1923, TRANSACTIONS ---------- 422

E

Education; Symposium on Metallurgical Education ----------169, 302
Effect of Iron-Carbon Eutectoid and Extrapolation of the Heating and Cooling Curve Values to Zero Rates; Identification of the Thermal Effect—*Dr. Anson Hayes, H. E. Flanders and E. E. Moore*-------- 183
Effect of Temperature on the Impact Resistance of Low-Carbon Steel Deformed at Different Temperatures—*Nicholas Richardson and E. K. MacNutt* ---------- 348
Effects of the Ferromagnetic Substances; Correlation between the Mechanical Hardness and the Magnetostrictive Effects—*S. R. Williams* ---------- 362
Electric Steel for Commercial Castings; Manufacture of Acid Steel—*L. J. Barton* ---------- 369
Electrical Energy Economical for Heat Treating—*E. F. Collins* 67
Elevated Temperatures; Physical Properties of Metals at—*V. T. Malcolm* 256
Energy Economical for Heat Treating; Electrical—*E. F. Collins*------- 67
Essential Fundamentals for Improved Quality Steel Production—*Emil Gathmann* ---------- 158
Eutectoid and Extrapolation of the Heating and Cooling Curve Values to Zero Rates; Identification of the Thermal Effect of Iron-Carbon Eutectoid—*Dr. Anson Hayes, H. E. Flanders and E. E. Moore*------ 183

Extrapolation of the Heating and Cooling Curve Values to Zero Rates; Identification of the Thermal Effect of Iron-Carbon Eutectoid and—*Dr. Anson Hayes, H. E. Flanders and E. E. Moore* ---- 183

F

Ferromagnetic Substances; Correlation between the Mechanical Hardness and the Magnetostrictive Effects of—*S. R. Williams* ---- 362
Fracture in Steel; Intercrystalline—*R. S. Williams and V. O. Homerberg* 399
Fundamental Defects of Hardened Steels—*Dr. Leslie Aitchison* ---- 491
Fundamentals Essential to Improved Quality Steel Production—*Emil Gathmann* ---- 158

G

Granulation Hypothesis and the Delta-Gamma Change in Iron-Carbon and Iron-Nickel Alloys—*Col. T. N. Belaiew* ---- 549

H

Hardened Steels; Some Fundamental Defects of—*Dr. Leslie Aitchison* -- 491
Hardening; Salt Baths and Containers for—*Sam Tour* ---- 7
Hardening Process; A Few Notes on the Shimer Hardening Process—*B. F. Shepherd* ---- 485
Hardness and the Magnetostrictive Effects of the Ferromagnetic Substances; Correlation between the Mechanical Hardness—*S. R. Williams* ---- 362
Hardness in Austenitized High Chromium Steels—*E. C. Bain* ---- 89
Hardness of Steel Balls by Magnetic Tests—*S. R. Williams* ---- 479
Head Temperatures; Characteristics of Heating Curves and Their Applicability for Calculating the Time Required to Reach Constant Head Temperatures—*E. J. Janitzky* ---- 201
Heating and Cooling Curve Values to Zero Rates; Identification of the Thermal Effect of Iron-Carbon Eutectoid and Extrapolation of—*Dr. Anson Hayes, H. E. Flanders and E. E. Moore* ---- 183
Heating Curves, Characteristics and Their Applicability for Calculating the Time Required to Reach Constant Head Temperatures—*E. J. Janitzky* ---- 201
Heat Treating; Electrical Energy Economical for—*E. F. Collins* ---- 67
Heat Treatment of Aluminum-Copper Alloys—*A. Portevin and F. Le-Chatelier* ---- 457
Hypothesis and the Delta-Gamma Change in Iron-Carbon and Iron-Nickel Alloys; Granulation—*Col. N. T. Belaiew* ---- 549

I

Identification of the Thermal Effect of the Iron-Carbon Eutectoid and Extrapolation of the Heating and Cooling Curve Values to Zero Rates—*Dr. Anson Hayes, H. E. Flanders and E. E. Moore* ---- 183
Impact Resistance of Low-Carbon Steel Deformed at Different Temperatures; Effect of Temperature on—*Nicholas Richardson and E. K. MacNutt* ---- 348

Improved Quality Steel Production; Fundamentals Essential for—*Emil Gathmann* ---------- 158
Industry; Research, the Mother of Industry—*Arthur D. Little* ---------- 195
Intercrystalline Fracture in Steel—*R. S. Williams and V. O. Homerberg* 399
Investigation of the Treatment of Steel for Permanent Magnets—*R. L. Dowdell* ---------- 27
Iron-Carbon and Iron-Nickel Alloys; Granulation Hypothesis and the Delta-Gamma Change in—*Col. N. T. Belaiew* ---------- 549
Iron-Carbon Eutectoid and Extrapolation of the Heating and Cooling Curve Values to Zero Rates; Identification of the Thermal Effect of —*Dr. Anson Hayes, H. E. Flanders and E. E. Moore* ---------- 183
Iron-Nickel and Iron-Carbon Alloys; Granulation Hypothesis and the Delta-Gamma Change in—*Col. N. T. Belaiew* ---------- 549

L

Low-Carbon Steel Deformed at Different Temperatures; Effect of Temperature on the Impact Resistance of—*Nicholas Richardson and E. K. MacNutt* ---------- 348

M

Magnetic Analysis; Present Status of—*R. L. Sanford* ---------- 577
Magnetic Tests; Hardness of Steel Balls by—*S. R. Williams* ---------- 479
Magnetostrictive Effects of the Ferromagnetic Substances; Correlation between the Mechanical Hardness and the—*S. R. Williams* ---------- 362
Magnets; Investigation of the Treatment of Steel for Permanent Magnets—*R. L. Dowdell* ---------- 27
Manufacture of Acid Electric Steel for Commercial Castings—*L. J. Barton* ---------- 369
Mechanical Hardness and the Magnetostrictive Effects of the Ferromagnetic Substances; Correlation between the—*S. R. Williams* ---------- 362
Metallography; Transparent Metallography—*L. V. Foster* ---------- 413
Metallurgical Education Symposium ----------169, 302
Metals at Elevated Temperatures; Physical Properties of—*V. T. Malcolm* ---------- 256
Mines; Notes from the U. S. Bureau of ---------- 114
230
424
513
606
Molybdenum Steel—Some Production Data—*E. W. Pierce* ---------- 571

N

Notes from the U. S. Bureau of Mines ---------- 114
230
424
513
606

Notes from the U. S. Bureau of Standards ---------- 111
228
329
427
511
605
Notes on the Shimer Case Hardening Process—*B. F. Shepherd*---------- 485

P

Patents; Reviews of Recent Patents ---------- 122
235
341
438
529
625
Permanent Magnets; Investigation of the Treatment of Steel for—*R. L. Dowdell* ---------- 27
Physical Propreties of Metals at Elevated Temperatures—*V. T. Malcolm* 256
Present Status of Magnetic Analysis—*R. L. Sanford* ---------- 577
Process; A Few Notes on the Shimer Case Hardening Process—*B. F. Shepherd* ---------- 485
Production; Fundamentals Essential to Improved Quality Steel Production—*Emil Gathmann* ---------- 158
Production Data on Molybdenum Steel—*E. W. Pierce*---------- 571
Properties of Metals at Elevated Temperatures; Physical—*V. T. Malcolm* 256

Q

Quality Steel Production; Fundamentals Essential to Improved Production—*Emil Gathmann* ---------- 158
Question Box ---------- 106
223
331
430
515
609

R

Rates; Identification of the Thermal Effect of Iron-Carbon Eutectoid and Extrapolation of the Heating and Cooling Curve Values to Zero Rates—*Dr. Anson Hayes, H. E. Flanders and E. E. Moore*---------- 183
Research, the Mother of Industry—*Arthur D. Little* ---------- 195
Resistance of Low-Carbon Steel Deformed at Different Temperatures; Effect of Temperature on the Impact—*Nichols Richardson and E. K. MacNutt* ---------- 348
Reviews of Recent Patents ---------- 122
235
341
438
529
625

Rolled Strip Steel; Cold—*Malcolm Farmer* ---------- 590

S

Salt Baths and Containers for Hardening—*Sam Tour* ---------- 7
Secondary Hardness in Austenitized High Chromium Steels—*E. C. Bain* 89
Sheet Steel Specifications; Automobile—*H. M. Williams* ---------- 82
Shimer Case Hardening Process; A Few Notes on—*B. F. Shepherd*----- 485
Simplification and Standardization—*R. M. Hudson* ---------- 276
Some Fundamental Defects of Hardened Steels—*Dr. Leslie Aitchison*--- 491
Some Production Data on Molybdenum Steel—*E. W. Pierce*---------- 571
Specifications; Automobile Sheet Steel—*H. M. Williams* ---------- 82
Standardization and Simplification—*R. M. Hudson* ---------- 276
Standards; Notes of the U. S. Bureau of Standards---------- 111
228
329
427
511
605

Status of Magnetic Analysis; Present—*R. L. Sanford* ---------- 577
Steel; Cold Rolled Strip Steel—*Malcolm Farmer* ---------- 590
Steel; Intercrystalline Fracture in Steel—*R. S. Williams and V. O. Homerberg* ---------- 399
Steel Balls by Magnetic Tests; Hardness of—*S. R. Williams*---------- 479
Steel Castings—A Comparison of Carbon and Carbon-Vanadium Castings *J. M. Lessells* ---------- 144
Steel Deformed at Different Temperatures; Effect of Temperature on the Impact Resistance of Low-Carbon—*Nicholas Richardson and E. K. MacNutt* ---------- 348
Steel for Commercial Castings; Manufacture of Acid Electric Steel—*L. J. Barton* ---------- 369
Steel for Permanent Magnets; Investigation of the Treatment of—*R. L. Dowdell* ---------- 27
Steel Production; Fundamentals Essential to Improved Quality Production —*Emil Gathmann* ---------- 158
Steel—Some Production Data; Molybdenum—*E. W. Pierce* ---------- 571
Steel Specifications; Automobile Sheet—*H. M. Williams* ---------- 82
Steel; Secondary Hardness in Austenitized High Chromium Steels—*E. C. Bain* ---------- 89
Steels; Some Fundamental Defects of Hardened Steels—*Dr. Leslie Aitchison* ---------- 491
Strip Steel; Cold Rolled—*Malcolm Farmer* ---------- 590
Substances; Correlation between the Mechanical Hardness and the Magnetostrictive Effects of the Ferromagnetic Substances—*S. R. Williams* ---------- 362
Symposium on Metallurgical Education ---------- 169, 302

T

Technical Articles; Abstracts of ---------- 119
233
338
435
527
623

Temperature on the Impact Resistance of Low-Carbon Steel Deformed at Different Temperatures; Effect of—*Nicholas Richardson and E. K. MacNutt* ---------- 348

Temperatures; Characteristics of Heating Curves and Their Applicability for Calculating the Time Required to Reach Constant Head Temperatures—*E. J. Janitzky* ---------- 201

Temperatures; Effect of Temperature on the Impact Resistance of Low-Carbon Steel Deformed at Different Temperatures—*Nicholas Richardson and E. K. MacNutt* ---------- 348

Temperatures; Physical Properties of Metals at Elevated Temperatures —*V. T. Malcolm* ---------- 256

Tests; Hardness of Steel Balls by Magnetic Tests—*S. R. Williams*---- 479

Thermal Effect of the Iron-Carbon Eutectoid and Extrapolation of the Heating and Cooling Curve Values to Zero Rates; Identification of —*Dr. Anson Hayes, H. E. Flanders and E. E. Moore*---------- 183

Time Required to Reach Constant Head Temperatures; Characteristics of Heating Curves and Their Applicability for Calculating the—*E. J. Janitzky* ---------- 201

Transparent Metallography—*L. V. Foster* ---------- 413

Treatment of Aluminum-Copper Alloys; Heat—*A. Portevin and F. Le-Chatelier* ---------- 457

Treatment of Steel for Permanent Magnets; Investigation of—*R. L. Dowdell* ---------- 27

V

Values to Zero Rates; Identification of the Thermal Effect of Iron-Carbon Eutectoid and Extrapolation of the Heating and Cooling Curve—*Dr. Anson Hayes, H. E. Flanders and E. E. Moore*--------- 183

W

What is Case Depth?—*S. P. Rockwell and Frederick Downes*---------- 285

Written Discussion of Professor Albert Sauveur's Paper Entitled, "Crystallization of Iron and Its Alloys"—*O. W. Ellis* ---------- 209
—*Col. N. T. Belaiew* ---------- 219
—*E. E. Thum* ---------- 214

Z

Zero Rates; Identification of the Thermal Effect of Iron-Carbon Eutectoid and Extrapolation of the Heating and Cooling Curve Values to—*Dr. Anson Hayes, H. E. Flanders and E. E. Moore*----- 183
